

## Zombie Punks – 80s Inspired Horror Font

Introducing the first in a range of new font designs inspired by 80s VHS covers and the nostalgic video rental store experience.

Starting off with a classic horror flavour, Zombie Punks is a grungy, hand-drawn brush font supplied in two styles with additional underlines and paint spills. The perfect choice for use on movie posters and trailers, album covers, books and much more.

This all-caps design features punctuation, numerals and language support along with an alternative set of characters ensuring that you'll never have to repeat your e's or t's for a more convincing and natural hand-made look. Check out the visuals for more details and cool usage examples.
